Other sections

Certifications

The Complete 2024 Web Development Bootcamp - Udemy

date acquired Jul 2024

I completed an intensive course covering full-stack development, including HTML, CSS, JavaScript, Node.js, React. I gained practical skills through hands-on projects, building modern and functional web applications.

Learn JavaScript - Full Course for Beginners

date acquired Mar 2024

I completed a comprehensive course designed for beginners, covering the fundamentals of JavaScript. The course provided me with a solid understanding of key JavaScript concepts, including variables, functions, loops, and DOM manipulation, which are essential for frontend development.

Hobbies

soccer, video games

Projects

Personal Portofolio

period Jun 2024 - Jul 2024

Link: https://albertostan.github.io/personal-portofolio/

This portfolio reflects my work and progress in web development. It includes various projects, from an electronic wedding countdown card, to an interactive game and a replica of the iPhone interface, demonstrating my skills in HTML, CSS, JavaScript and responsive design. Each project highlights my attention to detail and passion for creating modern and functional web experiences.
